TANISHQ SAINI

Computer Applications Undergraduate

+91 8527-930-337 | tanishqsaini872@gmail.com | https://github.com/tanishq-sa | Ghaziabad, India 201016

EDUCATION

Bachelor of Computer Applications

Christ University, Pune Lavasa

2024 - 2028 | Pune, India

Commerce (With Computer Science)

D.A.V. Public School

EXPERIENCE

Game Developer Intern

Eklavya.me

06/2025 - 09/2025 | Goa, India

- Contributed to the development and maintenance of 5+ interactive LMS games (Riddle, Word Search, Alphabet, Unscramble, Matching), enhancing digital learning engagement.
- Worked within a pre-existing React + TypeScript + Tailwind codebase, implementing backend logic updates and dynamic JSON-based configurations without disrupting core architecture.
- Identified and resolved UI and gameplay bugs, improving stability and overall user experience across multiple modules.
- Deployed production-ready updates through Git-based pull request workflows and actively participated in Agile sprints using Zoho Sprints and Notion.

PROJECTS

Quotify API - Production-Grade REST Platform

https://quotify.dazzelr.tech

A secure, monetized quote delivery API designed with rate limiting and subscription-based access control.

- Built API key authentication with usage tracking, category filtering, and Razorpay-based subscription integration.
- Implemented rate limiting and anti-spam mechanisms to ensure system reliability and abuse prevention.

Dazzelr Image Converter – SaaS Web Application

https://dazzelr.tech

A subscription-based image conversion platform with user dashboards and controlled feature access.

- Developed authentication and profile-based access management with subscription-driven feature gating.
- Deployed scalable production builds using modern CI workflows and hosting infrastructure.

Discord Music Bot – Large-Scale Distributed Bot (20K+ Servers, 1M+ Users)

Distributed music streaming bot scaled to 20,000+ servers and 1M+ users.

- Designed advanced command handling and music queue systems.
- Managed large concurrent usage with optimized event-driven architecture.
- Maintained active deployment and scaling between 2019–2023.

SKILLS

Programming Languages

C++, Python, JavaScript, C#, SQL

Full-Stack Development (Frontend)

HTML5, CSS3, React.js, Next.js, React Router, Tailwind CSS, SVG

Full-Stack Development (Backend)

Node.js, Express.js, RESTful API Development, Authentication, Clerk, Firebase Auth, Discord.js, Bot Development

.NET Development

C#, Windows Forms, WinForms Desktop Applications

Database Technologies

MySQL, MongoDB, Mongoose, Firebase, Firestore

Automation

UiPath, RPA, Process Workflow Automation

Game Development

Unity, C#, 2D Game Development, Physics, Collision Systems,

DevOps & Deployment

Git, GitHub, Vercel, Netlify, Environment Variables Handling, Postman, Nodemon

KEY ACHIEVEMENTS

Monetized SaaS Product Development

Designed and deployed production-ready platforms (Quotify API & Image Converter) with subscription-based access, payment gateway integration (Razorpay), rate limiting, and secure authentication systems.

Production Software Contribution

Contributed to live LMS game modules within an Agile team environment, deploying updates via Git-based pull request workflows and improving application stability and user experience.
